

Contender Ballistic Vest

Product Images

Short Description

ROFI Contender ballistic vest provides maximum protection and comfort, fitted for both standard and back-neck collar and pelvic protector. The vest is equipped with pockets for upgrading ceramic inserts. Individual adjustments are possible at shoulder and waist for increased comfort to the user.

Description

ROFI splinter- and bullet proof vests are designed to give the best possible user comfort and correct protection. The requirements for personal protection vary and are individual, accordingly we make different models that can be adapted to suit the various ballistic protection levels. Protection level in accordance with NIJ 0101.03 as standard. Other protection standards available upon request.

The ROFI Body armor is suitable to both male and female users, the vest models are adjustable at the shoulders and waist for best possible comfort.

- Protecting front, back, neck and shoulder
- Option on pelvic protection
- Adjustable
- High protection and comfort levels

- Possible upgrade of the protection level through insertion of ceramic plates.
